New collection ITALIAN ECO-FRIENDLY FURNITURE BOARDS

WITH DEEP STRUCTURE

**Ecological boards
meet the same
standards as
wooden boards.**

The concept of producing ecological furniture boards is using wood-based materials that has already been used once, such as old furniture, wooden chairs or pallets, so you don't have to cut down new trees.

The Eco-Ethical Company

An eco-ethical company for which the main values are:
Environment, People, Earth, Quality and Innovation.

The entire panel production process is an integrated and repeatable cycle, from collecting waste wood to recycling and transforming raw materials into a new and functional product.

The Saviola Group is committed to protecting the environment and its resource at the same time giving customers the opportunity to protect the planet by choosing ecological products.
